

1) Data types in Java:

(1) int: (integer type)

Eg: `int marks = 50;`

`System.out.println(marks);`

(2) byte:

Stores small numbers.

Eg: `byte age = 25;`

`System.out.println(age);`

(3) Short:

Stores medium size numbers.

Eg: `Short Salary = 40000;`

`System.out.println(Salary);`

(4) Long:

Stores ~~very~~ large numbers.

Eg: `Long Phone = 123456789;`

`System.out.println(phone);`

(5) float:

Stores decimal numbers.

Eg: `float Percentage = 73.5f;`

`System.out.println(Percentage);`

(6) double:

Stores accurate decimal numbers.

`double Price = 23.55d;`

`System.out.println(Price);`

(7) boolean:

Stores true or false.

Eg: `boolean return = true`

`System.out.println(return);`
